

Examination II-2 Answer Key

Directions

Follow these steps carefully for completing the feedback part of SAEP:

1. After calculating your score, look up the answers for the examination items you missed as well as those on which you guessed, even if you guessed correctly. If you are guessing, it means the answer is not perfectly clear. In this process, we are committed to making you as knowledgeable as possible.
 2. Enter the number of missed and guessed examination items in the blanks on your Personal Progress Plotter.
 3. Highlight the answer in the reference materials. Read the paragraph preceding and the paragraph following the one in which the correct answer is located. Enter the paragraph number and page number next to the guessed or missed examination item on your examination. Count any part of a paragraph at the beginning of the page as one paragraph until you reach the paragraph containing your highlighted answer. This step will help you locate and review your missed and guessed examination items later in the process. It is essential to learning the material in context and by association. These learning techniques (context/association) are the very backbone of the SAEP approach.
 4. Once you have completed the feedback step, you may proceed to the next examination.
